Wood Recovery vs Disposal

Pallets and scrap wood fill up an open top quickly.

This causes more frequent pulls. Each dump costs your company time and money.

A 48' box trailer has the capacity to hold up to 144 cubic yards of material compared to a typical 30-yard open top dumpster.

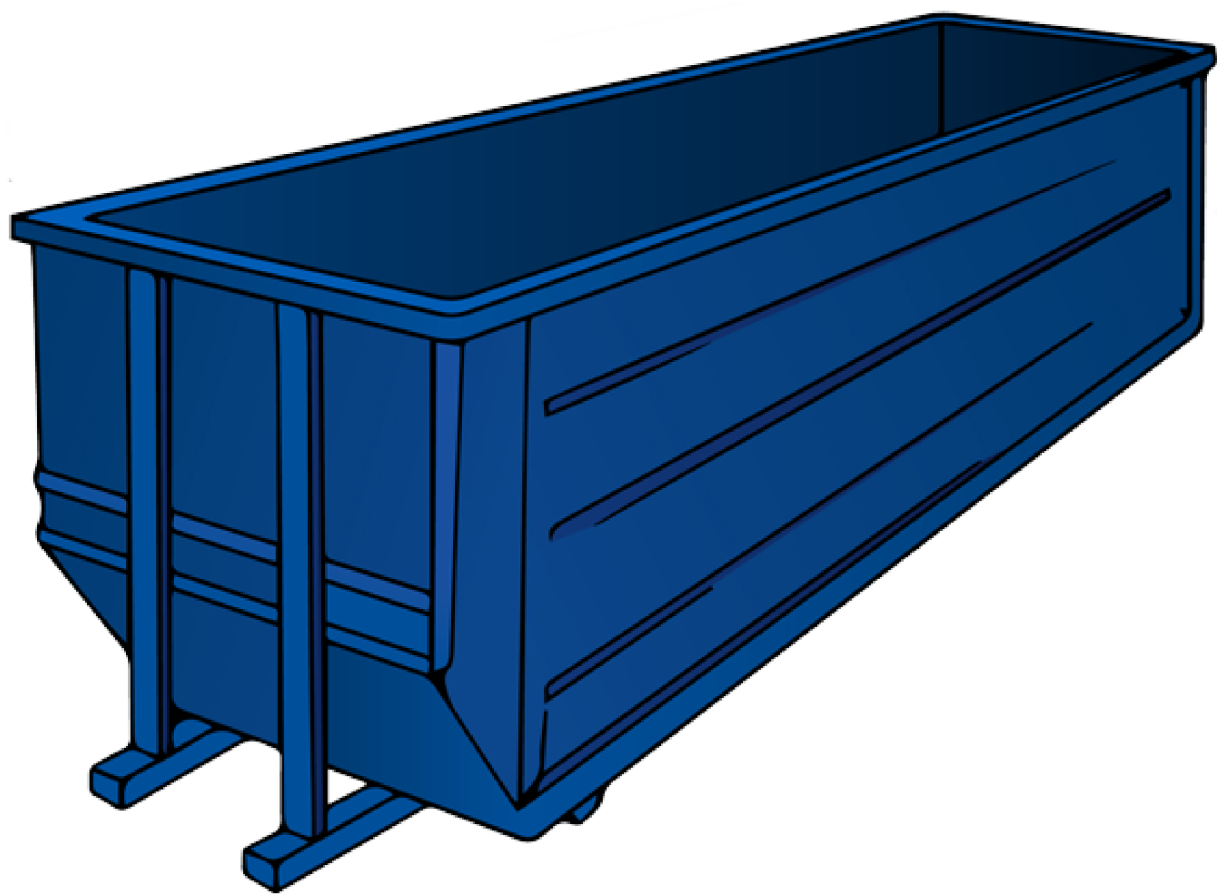

Box trailers allow for uniform stacking, maximizing the space resulting in less pulls a month.

We sort through the wood on these trailers when recycling it. Doing so allows us to offer rebates for all standard size pallets!

Wood Recovery vs Disposal

Cost Break Down

30 Yard Open Top Dumpster:

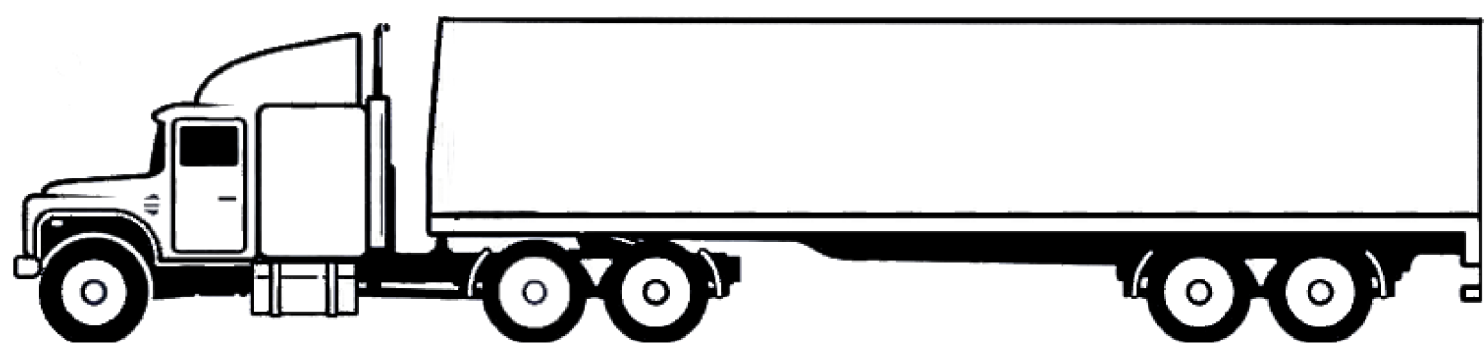

Typical Fees: ~\$350

Dimensions: 8' wide x 22' long

Capacity: 30 cubic yards

Price per yard, landfilled:

\$11.67

48' Box Trailer:

Typical Fees: ~\$950

Dimensions: 8' wide x 48' long

Capacity: 135 cubic yards

Price per yard, recycled:

\$7.04

One box trailer is equivalent to four and a half
30 yard open top dumpsters.
